International tourist arrivals  
recover pre-pandemic levels in 2024

## UN Tourism

The World Tourism Organization (UN Tourism) is the United Nations specialized agency mandated with the promotion of responsible, sustainable and universally accessible tourism. UN Tourism's membership includes 160 countries, 6 associate members, 2 permanent observers, and over 500 affiliate members representing the private sector, educational institutions, tourism associations and local tourism authorities.

## About the *World Tourism Barometer*

The *World Tourism Barometer* is a publication of the World Tourism Organization (UN Tourism) that monitors short-term tourism trends on a regular basis to provide global tourism stakeholders with up-to-date analysis on international tourism.

The information is updated several times a year and includes an analysis of the latest data on tourism destinations (inbound tourism) and source markets (outbound tourism). The Barometer also includes three times a year a Confidence Index based on the UN Tourism Panel of Experts survey, which provides an evaluation of recent performance and short-term prospects on international tourism.

The UN Tourism Secretariat wishes to express its gratitude to those who have contributed to the production of this *World Tourism Barometer*, in particular to institutions that supplied data, and to the members of the UN Tourism Panel of Experts for their valuable feedback and analysis.

This report was prepared under the coordination of Zoritsa Urosevic, Executive Director, by the Market Intelligence, Policies and Competitiveness Department, under the supervision of Sandra Carvão, Director of the Department. Authors include (in alphabetical order): Fernando Alonso, Michel Julian and Javier Ruescas. Data was compiled from the [Tourism Market Intelligence Database](#) and the [Tourism Statistics Database](#) based on official country sources.

For more information including copies of previous issues, please visit: [www.e-unwto.org/loi/wtobarmetereng](http://www.e-unwto.org/loi/wtobarmetereng).

We welcome your comments and suggestions at: [barom@unwto.org](mailto:barom@unwto.org).

---

Data collection for this issue was closed mid-January 2025.

The next issue of the *World Tourism Barometer* with more comprehensive results is scheduled to be published in May 2025.

Pages 1–8 of this document constitute the Excerpt of the *World Tourism Barometer*. The full document is available free of charge for UN Tourism Members and subscribers from the UN Tourism Elibrary at [www.e-unwto.org](http://www.e-unwto.org). This release is available in English, while the Statistical Annex is provided in English, French and Spanish.

## Key results

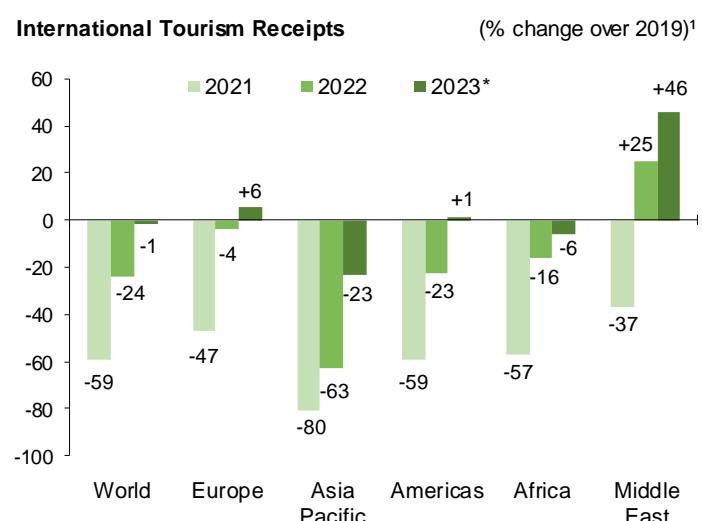

### **International tourist arrivals recovered pre-pandemic levels in 2024**

- International tourism virtually recovered (99%) pre-pandemic levels in 2024, with most destinations exceeding 2019 numbers.
- 2024 marks the recovery of international tourism from its worst crisis on recorded history, four years after the outbreak of the COVID-19 pandemic.
- An estimated 1.4 billion international tourists (overnight visitors) were recorded around the world in 2024, an increase of 11% over 2023, or 140 million more.
- Results were driven by strong post-pandemic demand, robust performance from large source markets and the ongoing recovery of destinations in Asia and the Pacific.
- The Middle East remained the strongest-performing region when compared to 2019, with international arrivals climbing 32% above pre-pandemic levels in 2024, though 1% compared to 2023.
- Europe welcomed 1% more arrivals than in 2019 and 5% over 2023, while Africa saw a 7% increase in arrivals compared to 2019 and 12% more than in 2023.
- The Americas recovered 97% (-3% over 2019) of its pre-pandemic arrivals, and Asia and the Pacific 87% (-13% over 2019).
- By subregions, North Africa (+22%) and Central America (+17%) saw the strongest performance in 2024 over 2019.
- According to preliminary estimates, international tourism receipts reached USD 1.6 trillion in 2024, about 3% more than in 2023 and 4% more than in 2019 (real terms). Receipts had already recovered pre-pandemic levels in 2023. Total export revenues from tourism (receipts and passenger transport) are estimated at a record USD 1.9 trillion in 2024, about 3% higher than 2019.
- International tourist arrivals are expected to grow 3% to 5% in 2025 compared to 2024.
- Based on the latest survey of UN Tourism Panel Experts, about 64% of professionals expect 'better' or 'much better' performance in 2025 compared to 2024.
- The positive outlook for the sector is reflected in the latest UN Tourism Confidence Index, with a score of 130 for 2025 (on a scale of 0 to 200 where 100 indicates similar expected performance).
- However, economic and geopolitical challenges continue to pose significant risks to the sector in 2025.

## Inbound tourism

### ***International tourist arrivals reached 1.4 billion in 2024, an increase of 11% over 2023***

- The year 2024 marks the recovery of international tourism from its worst crisis ever, four years after the outbreak of the COVID-19 pandemic.
  - An estimated 1.4 billion international tourists (overnight visitors) were recorded around the world in 2024, that is 99% of pre-pandemic levels. This represents an increase of 11% over 2023, or 140 million more.
  - Results were driven by strong post-pandemic demand, robust performance from large source markets globally and the ongoing recovery of destinations in Asia and the Pacific. Increased air connectivity and enhanced visa facilitation also supported international travel.
  - The last three months of 2024 were particularly strong, with arrivals exceeding pre-pandemic levels by 3% in October, 1% in November and 1% in December.
  - The post-pandemic recovery falls within the scenarios for 2021-2024 prepared by UN Tourism in December 2020, which pointed to a recovery of 2019 arrivals in two and a half, three or four years depending on various circumstances. It was the third scenario that eventually played out, which projected a return to pre-pandemic levels by the end of 2024.
  - The year 2024 also saw extraordinary levels in visitor spending, with tourism earnings growing faster than arrivals in many destinations, compared to 2019.
- compared to 2019, among which Qatar (+137%), Saudi Arabia (+69%) and Egypt (+23%).
- Africa** (74 million) welcomed 7% more arrivals compared to 2019 and 12% more than in 2023. Ethiopia (+40%), and Morocco (+35%) both reported double-digit growth and Tunisia (+9%), Kenya (+9%) also exceeded 2019 numbers.
  - Europe**, the world's largest destination region, saw 747 million international arrivals in 2024 (+1% above 2019 and 5% over 2023), supported by strong intraregional demand. All subregions surpassed pre-pandemic levels, except for Central and Eastern Europe where many destinations are still suffering from the lingering effects of the Russian aggression on Ukraine.
  - The highest growth in Europe in the first ten to twelve months of 2024 was reported by Albania (+80%), Andorra (+35%), Malta and Serbia (both +29%), where arrivals climbed well above 2019 figures.
  - Among the larger destinations, Portugal reported 18% more arrivals than in 2019 and Denmark 17% more, while Greece and Türkiye both recorded 14% more and Spain 10%. A total of 21 European destinations surpassed pre-pandemic levels during this period.
  - The **Americas** (213 million) recovered 97% of pre-pandemic arrivals with the Caribbean and Central America already exceeding 2019 levels fueled by strong US outbound travel. The region saw a 7% growth over 2023.
  - EI Salvador (+81%), Curaçao (+51%), Colombia (+37%), Guatemala, (+33%), the Dominican Republic (+32%), Aruba (+27%), Panama (+17%) and Chile (+16%) were among the strongest performers in the first ten to twelve months of 2024 compared to 2019.
  - Asia and the Pacific** (316 million) continued to experience a rapid recovery, where arrivals reached 87% of its pre-pandemic numbers as compared to 66% at the end of 2023. International arrivals grew 33% in 2024, an increase of 78 million from 2023.

### ***The Middle East, Europe and Africa performed strongest in 2024 compared to 2019***

- The recovery has been uneven across regions. Europe, the Middle East and Africa all surpassed pre-pandemic numbers in 2024, while the Americas came close (-3%) and Asia and the Pacific remained 13% below 2019 levels due to slower lifting of restrictions.
- The **Middle East** (95 million arrivals) remained the strongest-performing region relative to 2019, with international arrivals climbing 32% above pre-pandemic levels in 2024, though 1% versus 2023.
- Some Middle Eastern destinations reported strong results in the first ten to twelve months of 2024

- South Asia saw the best results by Asian subregions, with a 92% recovery (-8% from 2019), followed by South-East Asia (88%), Oceania (83%) and North-East Asia (86%).
- Across individual destinations, Maldives posted the highest growth in the region (+20% versus 2019), followed by Japan (+16%) which benefitted from the depreciation of the yen and enhanced connectivity. Fiji saw 10% more international arrivals this period and Sri Lanka 7% more compared to 2019.
- According to air booking data provided by [ForwardKeys](#) international air travel to China improved from -41% in Q4 2023 to -12% in Q4 2024 (relative to 2019), showing a steady recovery of China's inbound tourism.
- By subregions, North Africa and Central America saw the strongest performance in 2024, with 22% and 17% more international arrivals than before the pandemic respectively. Southern Mediterranean Europe (+8%) and the Caribbean (+7%) also enjoyed robust growth, as did Northern Europe (+5%) and Western Europe (+2%).
- South America virtually recovered pre-pandemic levels, while Subsaharan Africa recovered 96%.
- Globally, the best performing destinations with data for the full twelve months of 2024 were El Salvador (+81%), Saudi Arabia (+69%), Ethiopia (+40%), Morocco (+35%), Guatemala (+33%) and the Dominican Republic (+32%).
- The best performers reporting data through November 2024 were Albania (+80% versus 2019), Curaçao (+49%), Colombia (+37%), Andorra (+35%), Malta and Serbia (both +29%).
- The full recovery of international tourism in 2024 is also reflected in the performance of other industry indicators. According to the [UN Tourism Tracker](#), both international air capacity and passenger demand virtually recovered pre-pandemic levels through October 2024 (IATA). Global occupancy in accommodation establishments reached 66% in November, slightly below 69% in November 2023 (based on STR data).

***Export revenues from tourism reached a record USD 1.9 trillion in 2024***

- International tourism receipts saw robust growth in 2024 after having surpassed pre-pandemic levels already in 2023.
- According to preliminary estimates, receipts reached USD 1.6 trillion in 2024, about 3% more than in 2023 and 4% more than in 2019 (real terms).
- As growth stabilizes, average spending per international arrival is also dropping to pre-pandemic values, from nearly USD 1,400 in 2020 and 2021, to an estimated USD 1,100 in 2024. This is still above the average of USD 1,000 per trip before the pandemic (in real terms).
- Total export revenues from tourism (including passenger transport) are estimated at a record USD 1.9 trillion in 2024, about 3% higher than before the pandemic, according to preliminary estimates.
- Several destinations reported outstanding growth in international tourism receipts in the first nine to eleven months of 2024. These include El Salvador (+206%), which earned three times as much as in 2019, Saudi Arabia (+148%), Albania (+136%), Serbia (+98%) and Canada (+70%), all in local currencies. These countries also enjoyed double-digit growth compared to 2023.
- Among the world's top tourism earners, the United Kingdom (+40%), Spain (+36%), France (+27%) and Italy (+23%) saw robust growth in the first nine to eleven months of 2024 compared to 2019.
- Data on international tourism expenditure reflects the same trend, especially among large source markets such as Germany, the United Kingdom (both +36% compared to 2019), the United States (+34%), Italy (+25%) and France (+11%). Expenditure from India continues to show extraordinary growth, with an increase of 81% above 2019 levels.

\* change in real terms.

## Outlook for 2025 points to continued growth

- International tourist arrivals are expected to grow 3% to 5% in 2025 (compared to 2024) driven by remaining pent-up demand and strong travel from large source markets, assuming a continued recovery of Asia and the Pacific and solid growth in most other regions.
- Data shows there is still room for recovery across several regions and subregions, in particular Asia and the Pacific, Central and Eastern Europe, and North America.
- This projection for 2025 also assumes global economic conditions remain favorable, inflation continues to recede, especially services inflation, and geopolitical conflicts do not escalate.
- The outlook reflects a stabilization of year-on-year growth rates after a strong rebound in international arrivals in 2023 (+33%) and 2024 (+11%).
- Growth rates are expected to drop to levels more common before the pandemic, when arrivals grew an average 4.9% per year (between 2009 and 2019). This stabilization will also occur across regions and destinations which were still recovering in 2024.

- The latest UN Tourism Confidence Index confirms these positive expectations, with 64% of UN Tourism Panel Experts expecting 'better' or 'much better' performance in 2025, compared to 2024. Some 26% expect similar performance, while only 9% believe 2025 will be 'worse' or 'much worse' than last year.
- However, more than half of survey respondents point to high transport and accommodation costs and other economic factors (such as volatile oil prices) as important challenges tourism will face in 2025. As a result, tourists are expected to continue to seek value for money, but could also make shorter trips or spend less, in response to elevated prices.
- Geopolitical risks (aside from ongoing conflicts) are a growing concern among the Panel of Experts, which ranked them third, after the economic factors. Extreme weather events and staff shortages are also critical challenges, ranking fourth and fifth among the adverse factors identified by the Panel of Experts.
- Balancing growth and sustainability will be critical in 2025, as reflected by two major trends identified by the Panel of Experts: the search for sustainable practices and the discovery of lesser-known destinations.

International tourist arrivals (year-on-year % change)\*

Source: World Tourism Organization (UN Tourism)

(Data as of January 2025)

\* Percentage change figures are year on year, except for 2021-2024 which are relative to pre-pandemic year 2019.

## Industry indicators

### *International air traffic recovered pre-pandemic levels in January-November 2024*

#### *Air passenger traffic*

- According to **IATA**, global air passenger traffic (international plus domestic traffic) recovered 99% of pre-pandemic levels in January-November 2024, measured in revenue passenger-kilometres (RPKs).
- In terms of international air traffic, RPKs fully recovered pre-pandemic levels in the first eleven months of 2024 (+0% RPKs over 2019).
- North America, Latin America and the Middle East saw international passenger traffic exceed 2019 levels by 8%, followed by Africa (+2%) and Europe (+1%). International RPKs in Asia and the Pacific remained 9% below 2019 levels, with particularly strong demand in November.
- Domestic air traffic (in RPKs) exceeded pre-pandemic levels by 10% in January-November 2024.
- By individual market, China (+20% RPKs) and India (+11%) by far exceeded 2019 levels in the first eleven months of 2024, as did the United States (+7%), Brazil (+5%) and Japan (+1%).

#### *Air capacity*

- Data from **IATA** shows international air capacity worldwide (measured in available seat-kilometres or ASKs) virtually recovering 2019 levels (-1%) in January-November 2024. North America (+8%), Latin America (+5%), Europe (+4%) and the Middle East (+1%) all exceeded pre-pandemic ASKs. International ASKs in Asia Pacific recovered 91% of 2019 levels through November 2024.
- Domestic air capacity (in ASKs) exceeded 2019 levels by 10% in January-November 2024. By market, China (+23%) and India (+13%) saw the strongest growth relative to 2019, followed by the United States (+9%) and Brazil (+6%). Australia recovered 98% and Japan 95% of 2019 levels respectively.

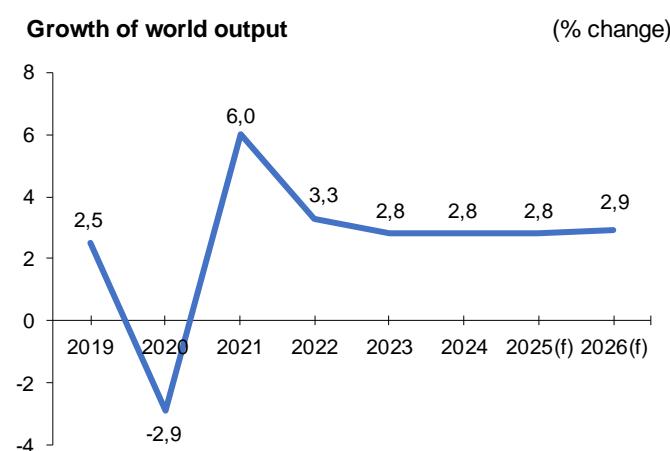

#### *Accommodation*

- According to **STR**, global occupancy in accommodation establishments reached 60% in December 2024, matching levels of December 2023 (60%). The Middle East (70%) recorded the highest occupancy in December 2024, followed by Asia Pacific (63%) and Europe (61%).
- By subregions, the Caribbean, Oceania, South Asia and South-East Asia achieved the highest occupancy rates in December 2024, with 69%. Northern Europe (68%), Western Europe (62%) and Central Eastern Europe (61%) also recorded rates above the world average. (Data by region are based on STR regions).

## Economic Environment

### **Subdued global outlook amid uncertainties**

- The world economy is forecast to grow 2.8% in 2025 and 2.9% in 2026 (equivalent to 3.2% and 3.3% respectively, using PPP weights)<sup>1</sup>, a stable but subdued pace of growth, according to the World Economic Situation and Prospects (WESP) 2025 by the United Nations Department of Economic and Social Affairs (UN DESA).

Source: World Economic Situation and Prospects 2025 (f) forecast

- The economy has remained quite resilient through 2024, avoiding a recession despite years of multiple shocks, including the global Covid-19 pandemic and a prolonged episode of inflation and subsequent interest rate hikes. Gradually subsiding inflation and lower interest rates are expected to boost consumer demand across many countries in 2025, though ongoing conflicts and rising geopolitical tensions could increase the downside risks.
- The United States economy is forecast to grow 1.9% in 2025, below the 2.8% estimated for 2024, while the European Union (+1.3%), the United Kingdom (+1.2%) and Japan (+1.0%) could see modest recoveries. In China (+4.8%) public sector investments and strong export performance could be partly offset by subdued consumption growth. The Indian economy is forecast to expand by 6.6% in 2025, supported by solid private consumption and investment.

- Declining headline inflation contrasts with persistent services price inflation, largely driven by housing and other services, including financial services, insurance, and medical care. Prices remain comparatively high in tourism services, a concern expressed by the UN Tourism Panel of Experts in all surveys since January 2023. In the last three, including the January 2025 survey, ‘high transport and accommodation prices’ came out as the top factor adversely impacting the sector, according to respondents (see “UN Tourism Confidence Index” section).

- Despite the generally positive outlook, the global economy is projected to grow below the 2010–2019 (pre-pandemic) average of 3.2% per year, reflecting structural challenges such as weak investment, slow productivity growth and high debt levels. Uncertainties also hang over the near-term economic outlook, including the possibility of higher tariffs and more trade restrictions which could disrupt value chains, undermine manufacturing and affect global growth.

See the *UN World Economic Situation and Prospects (WESP) 2025 report* by UN DESA, at: [www.un.org/development/desa/dpad/publication/world-economic-situation-and-prospects-2025](http://www.un.org/development/desa/dpad/publication/world-economic-situation-and-prospects-2025)

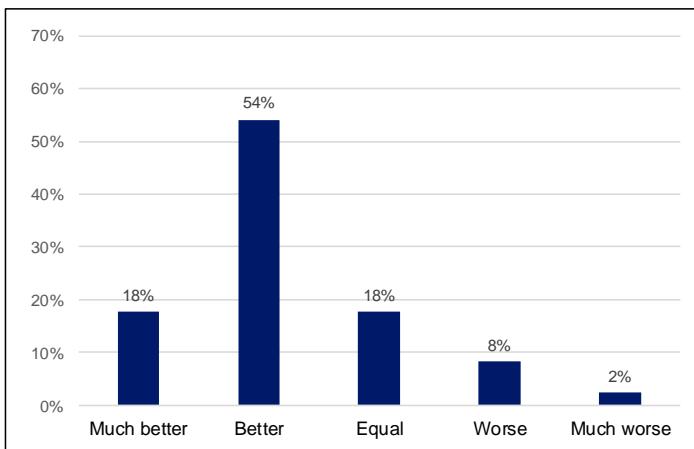

<sup>1</sup> GDP growth in WESP is based on market exchange rates, as opposed to purchasing power parity (PPP) as in other economic reports such as the WEO by the IMF.

## UN Tourism Confidence Index

**International tourism sees strong performance in 2024, with prospects for continued growth in 2025**

- The latest **UN Tourism Confidence Index** survey confirms the consolidation of the recovery experienced by international tourism in 2024. On a scale of 0 to 200 (where 100 indicates equal performance), the Index shows a score of 138 points for 2024, reflecting another strong year for tourism, slightly above prospects expressed in the January 2024 survey (136).
- Most of the UN Tourism Panel of Experts (72%) evaluated the year 2024 as better (54%) or much better (18%) than 2023. Only 10% considered it to be worse or much worse, while 18% saw similar performance.

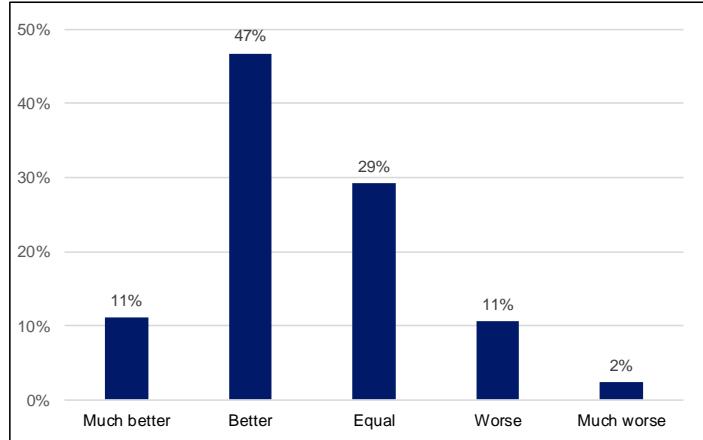

Evaluation of 2024

Source: January 2025 Survey of the UN Tourism Panel of Experts

- Despite economic and geopolitical headwinds, experts highlighted the strong demand seen in 2024, with higher-than-expected performance in the shoulder season, following the peak summer period in the Northern Hemisphere.
- The Panel rated the period **September-December 2024** with a score of 127, exceeding the expectations expressed in the September survey ahead of that 4-month period (120).
- Some 58% of survey respondents evaluated September-December 2024 as better (47%) or much better (11%) than expected, while 29% did not see any change. Only 13% considered it to be worse or much worse.

Evaluation of September-December 2024

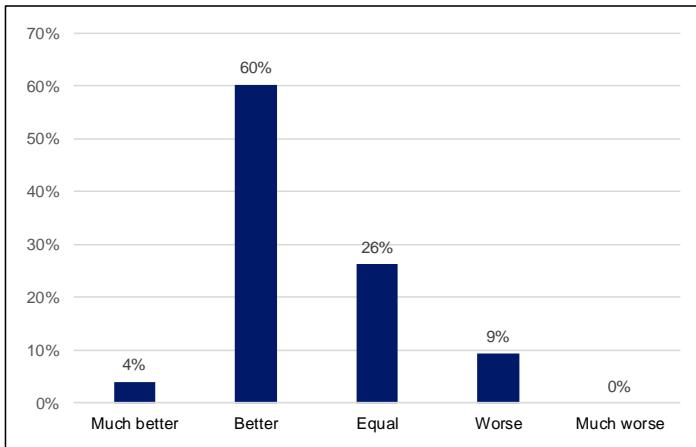

Source: January 2025 Survey of the UN Tourism Panel of Experts

- Experts mentioned the warm weather experienced by several destinations in Europe during Fall and the colder weather at the start of the winter season, which helped to keep up the pace of demand in the last months of 2024.

**Another positive year for international tourism expected in 2025**

- Following a strong 2024, international tourism is expected to see continued demand in **2025**, backed by remaining pent-up demand, robust performance from large source markets, enhanced connectivity and the continued recovery of Asian markets and destinations.
- Around 64% of UN Tourism Panel of Experts see better or much better prospects for 2025 compared to 2024. Some 26% expect similar performance in their destination, while only 9% believe 2025 be worse or much worse than last year.
- This translates into a Confidence Index of 130 for 2025 (on a scale of 0 to 200), indicating expectations for another positive year for tourism, though less bullish than the evaluation made for 2024 (138) and 2023 (152). This reflects the gradual normalization of international tourism after two years of strong rebound.

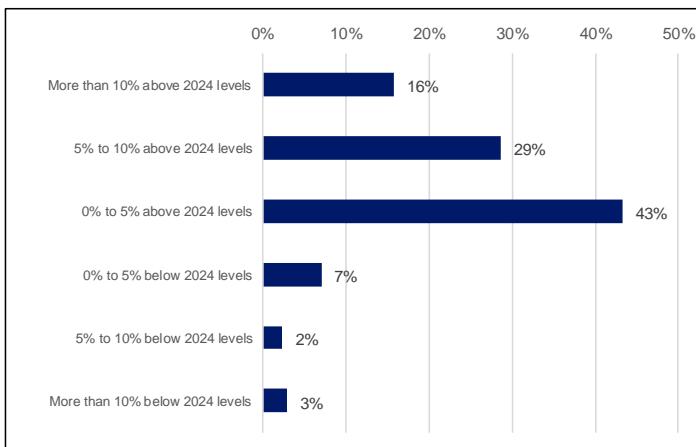

### Prospects for 2025

Source: January 2025 Survey of the UN Tourism Panel of Experts

- Most experts (88%) expect results in their respective destinations to exceed 2024 levels, of which 43% indicating an increase of 0% to 5% above 2024 levels, while 45% of respondents pointed to 5% growth or more above 2024.

### Compared to 2024, what levels of international tourist arrivals do you expect in your destination in 2025?

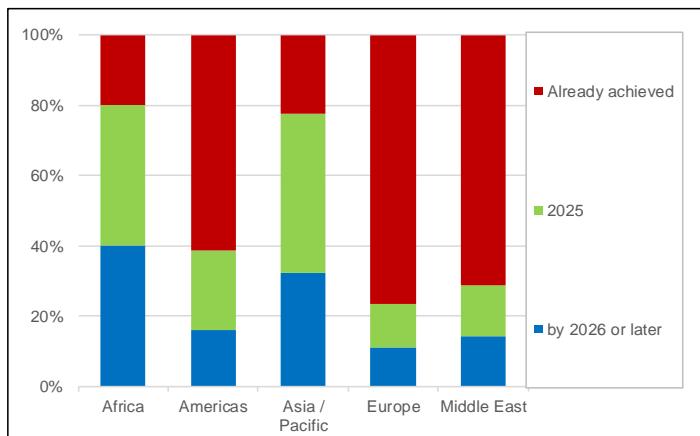

Source: January 2025 Survey of the UN Tourism Panel of Experts

- Some 58% of tourism professionals indicated that their destination had already recovered pre-pandemic levels. This share has increased from 39% in the January 2024 survey. Around 41% of UN Tourism Panel experts believe international tourism will return to 2019 levels in their destination either in 2025 (22%) or in 2026 or later (19%).
- The largest share of experts pointing to a return to 2019 levels in 2025 or later continues to be in Asia and the Pacific and Africa.
- In Asia and the Pacific, 45% of respondents from the region pointed to 2025 for a full tourism recovery and 32% to 2026. In Africa, 40% of experts indicated 2025

and 40% pointing to 2026 or later. This indicates a comparatively slower recovery of some destinations and markets in both regions.

### When do you expect international tourism to return to pre-pandemic 2019 levels in your country?

Source: January 2025 Survey of the UN Tourism Panel of Experts

- The ongoing recovery of **Chinese outbound and inbound tourism** is expected to be supported in 2025 by visa facilitation and improved air capacity. A total of 38 countries are exempted from visa to enter China, under the country's unilateral visa-free policy. In terms of outbound travel, the extension by one day of the 2025 Spring Festival (28 January - 4 February) peak holidays is expected to boost international travel. According to Trip.com, short-haul destinations in the Asia Pacific region remain popular destinations among Chinese travellers, where visa requirements are more flexible.
- Visa and travel facilitation measures** will continue to promote travel around the world. The 'GCC Grand Tours' unified tourist visa is expected to boost travel within the six countries belonging to the Gulf Cooperation Council (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab Emirates). In Africa, Angola, Botswana, Namibia, Zambia, and Zimbabwe unveiled a Schengen-inspired unified regional visa to expand travel within the Southern African region. In Europe, Romania and Bulgaria became fully part of the Schengen area of free movement from 1 January 2025.
- On the other hand, new digital entry schemes for strengthened border management in Europe would come into force in 2025. The European Union has announced the ETIAS electronic travel authorization, an entry requirement for visa-exempt nationals travelling to 30 European countries, including the Schengen area (<https://travel-europe.europa.eu/etias>).

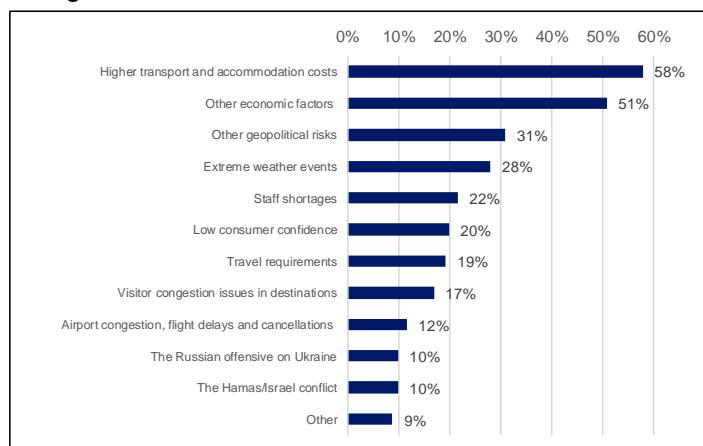

The ETIAS is expected to be implemented in 2025 and it is still not operating. The United Kingdom has implemented a similar electronic travel authorization (ETA) for visits to the UK up to six months, which is being rolled out incrementally since 8 January 2025 (<https://homeofficemedia.blog.gov.uk/electronic-travel-authorisation-eta-factsheet-january-2025/>).

### **Cautious optimism for the early months of 2025, with challenges remaining ahead**

- Expectations for the period **January-April 2025** indicate cautious optimism, with still pent-up demand in several subregions and destinations, though in an uncertain and volatile context. Slightly more than half of respondents expect better (43%) or much better (9%) performance, while 36% see equal performance or worse (12%).
- The first four months of the year cover most of the Northern Hemisphere winter season and the Southern Hemisphere summer season, as well as major travel periods such as the Chinese New Year and Easter.
- The UN Tourism Confidence Index shows a slight decline (126) in January-April 2025 when compared to the evaluation made for the previous period of September-December 2024 (130).
- Economic and geopolitical headwinds** continue to pose significant risks. More than half of respondents point to high transport and accommodation costs and other economic factors such as volatile oil prices, as the main challenges international tourism will face in 2025. Against this backdrop, tourists are expected to continue to seek value for money.
- Despite falling inflation, trade wars and geopolitical tensions could lead to renewed inflationary pressures, disruption in global supply chains and upward movements in interest rates. Inflation in services remains elevated, almost twice as high as before the pandemic, according to the International Monetary Fund.
- Exchange rate fluctuations might also affect travel decisions. A strong US dollar will continue to benefit travel from the United States to the Americas, Europe and beyond. Experts also mentioned that countries with weaker currencies such as the Japanese yen or the Turkish lira, have seen a inbound tourism to these destinations.

- Geopolitical risks** (aside from ongoing conflicts) are a growing concern among the Panel of Experts, which ranked them as third main factor after the economic ones.

### **What are the main challenges that international tourism is facing in 2025?**

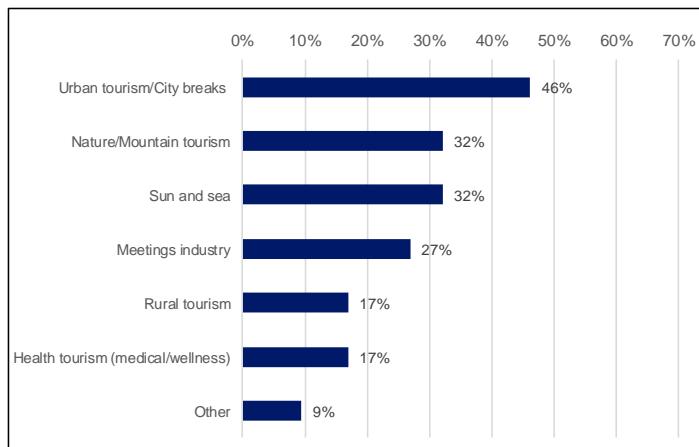

Source: January 2025 Survey of the UN Tourism Panel of Experts

- Continued uncertainty derived from the Russian aggression against Ukraine and other mounting geopolitical tensions, also represent downside risks. In a context of geopolitical volatility, some experts mentioned that destinations perceived as safe could benefit from increased demand.
- Extreme weather events** and **staff shortages** are also critical challenges, ranking fourth and fifth among the factors identified by the Panel of Experts.
- According to experts, extreme weather events are increasingly becoming a concern for many destinations and operators.
- Finally, Panel experts point out that staff shortages remain a critical issue, as tourism businesses face a shortfall in labour to cope with high travel demand, as well as industry needs.

### **Urban and city breaks continue to show strongest performance**

- According to the UN Tourism Panel of Experts, **urban and city breaks** continued to show the strongest performance, followed by nature and mountain tourism, as well as sun and sea.

**What segment is showing the fastest recovery or expansion in your destination?**

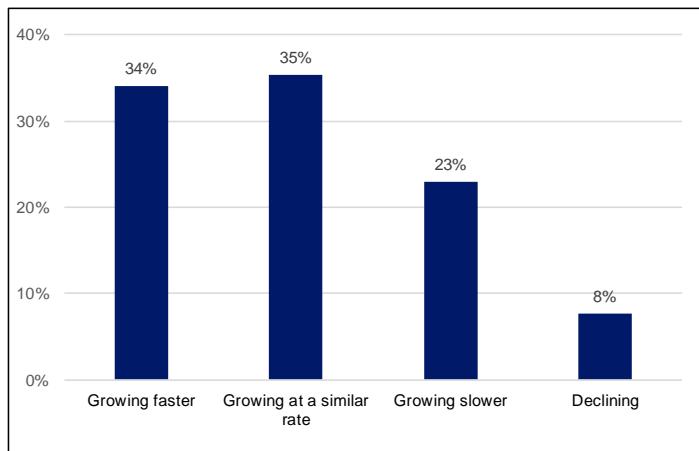

Source: January 2025 Survey of the UN Tourism Panel of Experts

- **Domestic tourism** continues to play a significant role, in particular in those with a large domestic market. Domestic tourism has been a key driver for the recovery of destinations in Asia which were slower to reopen. It has also partly compensated for weaker inbound travel in some Eastern European destinations affected by the proximity of the war in Ukraine.
- Some 70% of experts indicated that domestic tourism is growing faster in their destination (34%) or at a similar rate (35%) compared to before the pandemic.

- **Nature and mountain tourism** is increasingly gaining preference among travellers with more off-the-beaten path travel destinations, underlining the growing importance of sustainability in consumer choice.
- Balancing growth and sustainability will be critical in 2025, as reflected by two major trends identified by the Panel of Experts: the search for sustainable practices and the discovery of lesser-known destinations.
- Travellers and businesses are expected to increasingly use breakthrough technologies such as AI for more personalized visitor experience.
- Experts also highlighted the importance of **meetings and events**, with an increasing number of large international events and exhibitions worldwide, including sports events and music festivals. Asia will host several major international events such as Expo 25 Osaka (13 April 2025 - 13 November 2025), ASEAN Malaysia 2025 and APEC South Korea 2025. In Africa, Morocco will host the 35th edition of the African Cup of Nations (21 December 2025 - 18 January 2026).

**How is domestic tourism performing compared to before the pandemic in your destination?**

## Statistical Annex

Volume 23 • Issue 1 • January 2025

The following pages contain detailed tables on tourism related indicators such as international tourist arrivals, international tourism receipts and expenditure collected by UN Tourism from national institutions, as well as the International tourism in the Balance of Payments and the evaluation of UN Tourism Panel of Experts

Tables reflect yearly data and monthly or quarterly data currently available. Most data are preliminary and may be subject to revision. See the Methodological Notes at the end of this annex for further information on the data.

The tables on the following pages are not included in the free extract of the World Tourism Barometer. The full document is available in electronic format for sale and free for UN Tourism members and subscribers through the UN Tourism library at:

- English version: [www.e-unwto.org/content/w83v37](http://www.e-unwto.org/content/w83v37)
- French version: [www.e-unwto.org/content/t73863](http://www.e-unwto.org/content/t73863)
- Spanish version: [www.e-unwto.org/content/rn1422](http://www.e-unwto.org/content/rn1422)

## Contents

- International Tourist Arrivals by (Sub)region	A-3
- International Tourist Arrivals and Tourism Receipts (local currencies, constant prices), World and Regions	A-5
- International Tourist Arrivals by Destination (Top 50)	A-7
- International Tourism Receipts in US\$ (Top 50)	A-8
- International Tourism Receipts in euro (Top 50)	A-9
- International Tourism Expenditure in US\$ (Top 50)	A-10
- International Tourism Expenditure in euro (Top 50)	A-11
- Detailed tables by UN Tourism regions and subregions: International Tourist Arrivals and Tourism Receipts	
• Europe	A-12
• Asia and the Pacific	A-14
• Americas	A-16
• Africa	A-18
• Middle East	A-20
- International tourism in the Balance of Payments (BOP)	A-21
- Evaluation of UN Tourism Panel of Experts	A-22
- Methodological Notes	A-26

## Explanation of abbreviations and symbols used

- \* provisional figure or data
- | change of series or methodology
- .. figure or data not (yet) available
- n/a: not applicable
- mn: million (1,000,000)
- bn: billion (1,000,000,000) [note in Spanish 'miles de millones']
- trn: trillion (1,000,000,000,000) [note in Spanish 'billones']

**Q1:** January, February, March

**Q2:** April, May, June

**Q3:** July, August, September

**Q4:** October, November, December

**T1:** From January to April

**T2:** From May to August

**T3:** From Sept. to December

**H1:** From January to June

**H2:** From July to December

**YTD:** Year-to-date refers to the change in the months with data available, compared to the same period of the previous year. The (sub)regional totals are approximations for the whole (sub)region based on trends in countries for which data is available.

### Series of International Tourist Arrivals

**TF:** International tourist arrivals (ITA) at frontiers (excluding same-day visitors);

**THS:** ITA at hotels and similar establishments;

**TCE:** ITA at collective tourism establishments;

**VF:** International visitor arrivals at frontiers (tourists and same-day visitors);

**NHS:** Nights of international tourists in hotels and similar establishments;

**NCE:** Nights of international tourists in collective tourism establishments.

**n** Shaded rank numbers indicate an upward movement in the destination's place in the ranking over 2019.

### Series of International Tourism Receipts and Expenditure

All percentages are calculated from non-seasonally adjusted series in local currencies, unless otherwise indicated: **\$:** in US dollars; **€:** in euros; **sa:** seasonally-adjusted series.

For more on concepts, definitions and computation of data, please see the Methodological Notes on page A-26.

## UN Tourism Confidence Index

The UN Tourism Confidence Index is based on the results of an email survey conducted every four months since 2003 by the UN Tourism Secretariat among a *Panel of Experts*. The purpose of this survey is to collect opinions from tourism stakeholders worldwide regarding the performance of their destination/business in the last four months, and their expectations for the next four months.

### Questions on which the indicators are based:

- What is your assessment of tourism performance in your destination or business for the four months just ended (or about to end) as against what you would reasonably expect for this time of year?      [ ] much worse ; [ ] worse ; [ ] equal ; [ ] better ; [ ] much better
- What are the tourism prospects of your destination or business in the coming four months compared with what you would reasonably expect for this time of year?      [ ] much worse ; [ ] worse ; [ ] equal ; [ ] better ; [ ] much better

**Use of responses for calculation of the indicators:** In each survey Panel members are asked to rate both the performance of the previous four-month period and outlook for the coming four-month period on the following scale: much worse [0]; worse [50], equal [100]; better [150], much better [200]. The average of all replies then determines the confidence index. A value below 100 indicates a deterioration of performance, while a value above 100 represents an improvement. Results are broken down by region. These breakdowns should, however, be interpreted with caution as they may in some cases be based only on a relatively small number of responses.

**Weighting of respondents' replies:** There is no weighting. The score given by each respondent has the same weight, irrespective of the size of the destination or sector of activity.

**Sample:** The number of regular respondents to the *World Tourism Barometer* surveys stands currently at close to 250, spread across all regions and sectors but it is not a representative sample. However, the UN Tourism Secretariat's aim is to continuously expand and improve the Panel sample. Experts interested in participating in the survey are kindly invited to send an email to [barom@unwto.org](mailto:barom@unwto.org).

**Calendar:** This is an online survey conducted every four months, usually at the end of April, August and December, with responses collected over a period of 6 weeks, starting at the end of those months.

**Publication of results:** Results are usually published in January, May and September.

## Methodological Notes

### About the data

The monthly and quarterly statistics included in this issue have been compiled by the UN Tourism Secretariat based on preliminary data reported by the institutions of the various countries and territories (e.g. National Tourism Authorities, Statistics Offices, Central Banks) through websites, news releases and bulletins, or provided through direct contacts with officials or through international organisations such as the Caribbean Tourism Organization (CTO), the European Travel Commission (ETC), Eurostat or the Pacific Asia Travel Association (PATA).

Information in this issue reflects data available at the time of publication. Data may be updated or revised without notice in future issues of the *World Tourism Barometer* as it becomes available.

Countries that are not included, but which have monthly data at their disposal, are kindly requested to contact the UN Tourism Secretariat at [barom@unwto.org](mailto:barom@unwto.org).

For major concepts, definitions and classifications in the measurement of tourism, please see the International Recommendations for Tourism Statistics 2008 (IRTS 2008) at [www.unwto.org/methodology](http://www.unwto.org/methodology).

### International Tourist Arrivals data

In the tables on International Tourist Arrivals for the various UN Tourism regions, series are chosen that can serve as an indicator of trends in selected destinations.

The monthly series represented do not always coincide with the annual series usually reported for the various countries (e.g. visitor arrivals or nights instead of tourist arrivals) and sometimes only relate to a part of the total tourism flow (e.g. air traffic, specific entry points). See 'Explanation of abbreviations and symbols used' for more detailed information.

Regional and subregional totals are estimates by UN Tourism based on the latest trends and available data for individual destinations.

Data on international tourist arrivals for France correspond to Metropolitan France.

Starting in the March 2021 issue, data on international tourist arrivals for the United Arab Emirates (UAE) corresponds to the entire UAE, not only Dubai.

Information provided by the Russian Federation includes statistical data for the Autonomous Republic of Crimea and the city of Sevastopol, Ukraine, temporarily occupied by the Russian Federation.

### 2024 percentage change data

Tables with monthly and quarterly data include percentage change figures for 2024 over 2019, as well as the usual year-on-year change. This responds to the need to provide data that can be compared to the pre-pandemic levels of 2019, and not just to the unusual levels of 2023, when the tourism sector was still recovering from the coronavirus pandemic. Some growth figures for 2024 may seem strong compared to 2023, but in fact are weak when compared to 2019. Percentage figures for some months and quarters are extremely high because they reflect the change over the same month in 2023 when international arrivals or receipts were still low. Therefore, growth figures above 1000% are excluded and marked with an arrow sign (↑).

### Rankings

The country rankings shown in this Statistical Annex correspond to the year 2023 and are provisional due to missing data for 2023 from some large destinations.

### International Tourism Receipts and Expenditure data

For destinations, receipts from international tourism are a services export in their balance of payments (the 'travel' item) which includes all transactions related to the consumption of goods and services by international visitors, such as accommodation, food and drink, fuel, domestic transport, entertainment and shopping.

They include transactions generated by same-day as well as overnight visitors. Receipts from same-day visitors can be substantial, especially in the case of neighbouring countries where shopping accounts for a large amount of spending by cross-border, same-day visitors.

International tourism receipts (travel) do not include receipts from international passenger transport contracted from companies outside the travellers' countries of residence, which are reported in a separate category (passenger transport).

For the (sub)regional totals, estimates are made by UN Tourism for countries that have not yet reported results, based on the previous year's value and the trend for the (sub)region. Unlike arrivals, where revisions generally more or less balance out, receipts data tends to be revised upwards.

It should be noted that data as reflected by UN Tourism on international tourism receipts and expenditure for China is based on the balance of payments (BOP) travel credit and debit (as with other countries for reasons of consistency and

international comparability) reported by the State Administration of Foreign Exchange (SAFE) at [www.safe.gov.cn/en/BalanceofPayments/index.html](http://www.safe.gov.cn/en/BalanceofPayments/index.html).

In addition, according to the International Recommendations for Tourism Statistics 2008 (IRTS 2008), the balance of payments includes both business and personal purposes in the “travel” item. Business travel covers goods and services acquired by persons going abroad for all types of business activities. Personal travel covers goods and services acquired by persons going abroad for purposes other than business, such as vacations, participation in recreational and cultural activities, visits with friends and relations, pilgrimages, and education and health-related purposes. The “travel” item does not include international passenger transport, which is reported in a separate category in the BOP, under “transport”. For more information, please see the International Recommendations for Tourism Statistics 2008 (IRTS 2008) at: [www.unwto.org/methodology](http://www.unwto.org/methodology) and the IMF Balance of Payments and International Investment Position Manual (BPM6) at [www.imf.org/external/pubs/ft/bop/2007/bopman6.htm](http://www.imf.org/external/pubs/ft/bop/2007/bopman6.htm).

It should also be noted that there is a difference in the data of UN Tourism and those produced by the Ministry of Culture and Tourism of China (formerly the China National Tourism Administration) for 2014 and subsequent years.

### **Ranking of International Tourism Receipts and Expenditure**

It should be noted that changes in the ranking of international tourism receipts not only reflect relative performance of the destinations, but also exchange rate fluctuations of the local currencies against the US dollar. Conversely, changes in the ranking of international tourism expenditure do not only reflect variations in spending on outbound travel, relative to other countries, but also changes in the value of the local currency compared to the US dollar.

In 2023 exchange rate movements were generally moderate, with the US dollar depreciating by 3% against the euro. The exchange rate moved from an average 0.950 euro per US dollar in 2022 to 0.925 in 2023. Thus, the effect of converting tourism receipts earned in euros (by Euro area destinations) to US dollars was quite small. In contrast, the US dollar appreciated by 7% against the Chinese yuan, by 5% against the Japanese yen and the Indian rupee, and by 1% against the Korean won. In these Asian destinations tourism receipts expressed in US dollars were slightly lower due to the exchange rate.

### **Exchange rates and inflation**

With financial data measured in different currencies it is complicated to accurately determine variations in relative terms, as receipts have to be expressed in a common currency like the US dollar or the euro and generally are also reported at current prices, thus not taking account of exchange rate fluctuations and inflation. Exchange rate changes can substantially influence the values in US dollars reported from year to year. When the dollar appreciates against for instance the euro, worldwide receipts expressed in dollars relatively decrease, and vice versa in the case the dollar depreciates.

#### **Exchange rates: USD to EUR and vice versa, yearly average**

Year	USD to EUR	Change (%)	EUR to USD	Change (%)
2010	0.7543	5.2	1.3257	-5.0
2011	0.7184	-4.8	1.3920	5.0
2012	0.7783	8.3	1.2848	-7.7
2013	0.7530	-3.3	1.3281	3.4
2014	0.7527	0.0	1.3285	0.0
2015	0.9013	19.7	1.1095	-16.5
2016	0.9034	0.2	1.1069	-0.2
2017	0.8852	-2.0	1.1297	2.1
2018	0.8467	-4.3	1.1810	4.5
2019	0.8933	5.5	1.1195	-5.2
2020	0.8755	-2.0	1.1422	2.0
2021	0.8455	-3.4	1.1827	3.5
2022	0.9497	12.3	1.0530	-11.0
2023	0.9248	-2.6	1.0813	2.7

Source: Compiled from Eurostat

In order to account for exchange rate changes and inflation, international tourism receipts expressed in US dollar values (for reason of comparison) were converted back to the local currencies of each destination, weighted by the share in the total, and deflated by the relevant rate of inflation.

The World Tourism Organization (UN Tourism), a United Nations specialized agency, is the leading international organization with the decisive and central role in promoting the development of responsible, sustainable and universally accessible tourism. It serves as a global forum for tourism policy issues and a practical source of tourism know-how. Its membership includes 160 countries, 6 territories, 2 permanent observers and over 500 Affiliate Members.
